Skin Care Lotion

skin caring cream – rich, caring emulsion for the challenged skin on hands and body

Fields of application:
Hand hygiene is indispensable in all medical facilities. This includes not only washing and disinfection of hands but primarily skin protection and care, in order to shield the skin from damaging substances and other influences.
A targeted skin care supports the regeneration of the skin and strengthens its natural functions, and in this way can counteract work-related skin diseases.

Skin Care Lotion (SCL) cares for the skin challenged by environmental influences, prevents it from drying out, and enhances the regeneration of the skin.
Hypoallergenic substances, such as highly pure white oil, skin protecting vitamins A and E, pro-vitamin B5 and anti-inflammatory ingredient in chamomile (α-Bisabolol) guarantee optimal skin care. SCL is used for effective care of hands as well as of the whole body in case of environmentally and occupationally stressed skin.

Not only is the skin on the hands exposed to challenging influences but also that on the whole body. SCL is perfectly suited to care for the skin on the entire body, to prevent dryness and rough, chapped skin.

SCL is free of silicones and colourants and is suitable for all skin types.

Special characteristics:

- contains valuable skin caring substances
- rich cream for hand care
- suitable for body care
- subtle, pleasant scent
- very efficient

silikone free

Application:

- **For the skin care on the hands**
  Apply Skin Care Lotion several times a day, especially after work and before longer breaks as well as in your leisure time, sparingly – pea- to hazelnut-sized amount – to the skin. Rub in gently starting with the back of the hands. Pay special attention to the areas between the fingers, the finger tips, the edges of the hands, thumbs, nail folds, and wrists. Apply more often in case of heavily challenged skin.
- **For the body care**
  Apply Skin Care Lotion, as necessary, sparingly to the skin.

Ingredients:
Aqua, Caprylic / Capric Triglyceride, Cetearyl Alcohol, Ceteareth-25, Paraffinum Liquidum, Isopropyl Myristate, Ceteareth-6, Bisabolol, Tocopheryl Acetate, Retinyl Palmitate, Helianthus Annuus Seed Oil, Panthenol, Propyl-paraben, Methylparaben, Ethylparaben, Phenoxyethanol, Parfum.

Physical and chemical characteristics:

Appearance:	white, viscous cream
Scent:	characteristic
pH value:	approx. 6 at 20 °C
Density:	approx. 1 g/cm³ at 20 °C

Forms of delivery:

- carton with 18 x 500 ml bottles

also available:

- wall dispenser for 500 ml bottles
- dosage pump for 500 ml bottles

The product is manufactured according to the international Quality Management Systems ISO 9001 and EN ISO 13485.
